Email 1
Is this email Safe or Malicious?
Safe
My Analysis:

- The email is a casual conversation about games between friends, with no requests for personal information or sensitive data.
- The sender's email address matches the content of the conversation, and there are no suspicious links or attachments.
- The email aligns with the guidelines since it doesn't ask for any personal information or direct the user to any links for verification.

Email 2
Is this email Safe or Malicious?
Malicious
My Analysis:

- This email is from an unusual domain (Venture.ru) and contains a request to click a link to update an Office 365 account.
- The email asks for updates to your email address and mentions security and large files, which is not typical for genuine communications from Microsoft.
- This email fits the phishing criteria since it involves requesting personal information through a link and uses a suspicious domain.

Email 3
Is this email Safe or Malicious?
Malicious
My Analysis:

- The email contains a suspicious link to hxxps[://]www[.]faceerook[.]com[.]opt/login[.]htm, which is a misspelled version of Facebook and likely intended to steal login credentials.
- It asks the recipient to check if Facebook is working and includes a link that could be a phishing attempt.
- This email is malicious because it directs the recipient to a potentially harmful website.

Email 4
Is this email Safe or Malicious?
Safe
My Analysis:

- The email forwards a message about a gaming headset sale, with no suspicious links or requests for personal information.
- The email comes from a legitimate domain (i.massdrop.com) and the content appears to be a standard marketing communication.
- The email adheres to the guidelines as it does not ask for personal information or direct the user to any suspicious websites.

Email 5
Is this email Safe or Malicious?
Malicious
My Analysis:

- This email claims to be from an FBI agent and requests the use of your email account to send critical information. It's a classic example of a scam or phishing attempt.
- It uses urgency and a fake identity to manipulate the recipient, and asks for access to personal email accounts.
- The email fits the criteria of phishing and scam attempts, since it solicits sensitive information under false pretenses.

Email 6
Is this email Safe or Malicious?
Safe
My Analysis:

- The email exchange is between two ANZ employees and involves professional communication about a project.
- The email domain (@anz.com) and contact details are consistent with ANZ communication.
- It adheres to the guidelines as it doesn't involve requests for personal information or suspicious links.

Email 7
Is this email Safe or Malicious?
Malicious
My Analysis:

- The email contains a link to hxxp[://]iwhrhwicy[.]urlif[.]y/receipt[.]php, which is suspicious and obfuscated.
- The message promotes a car insurance discount but uses a questionable URL that does not correspond to a legitimate insurance provider.

- This email is likely phishing due to the suspicious link and promotional content that may be used to gather personal information.
